- DT41SPMBT32 (black)

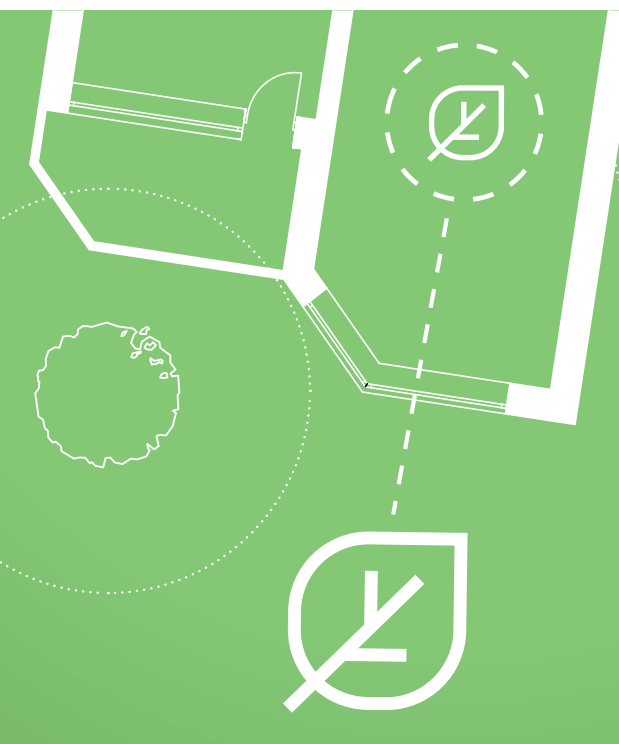

Designed for installers. Made for users.

DT4 Room Thermostats bring together slim, modern design with simple functionality. Easy to use, with features that are easy to love, they offer everything you and your customers want and need – just like you imagined.

Designed for compatibility

DT4 Room Thermostats are designed to work with on/off and OpenTherm® compatible heating and cooling appliances, such as boilers, heat pumps and district heating systems. Featuring both wired and wireless versions, they're designed to suit a variety of homes, and for a multitude of system applications. Simply choose the right fit for your customer.

Supporting greener energy systems.

DT4 Room Thermostats can be installed as a standalone thermostat or part of a wider home comfort solution with products such as the HCC100 underfloor multi-zone controller. DT4 Room Thermostats are compatible with a range of hybrid and greener energy systems and energy-efficient solutions such as heat pumps, zoning and underfloor heating and cooling devices.

The only thermostat you need

As the first point of contact for homeowners, installers know exactly what features household appliances should have and what they should look like. We listened to the feedback from our professionals to develop the DT4.*

Main features

- Designed for compatibility.
- Can be installed standalone or as a part of an existing system, including conventional and combi boilers.
- Easy-to-read, energy-efficient LED-based display that turns off when the screen is not in use.
- Wired or wireless versions to suit almost every installation.
- Integration with smart devices such as Honeywell Home evohome and the HCC100 underfloor multi-zone controller.
- Backlit, captive touch buttons.
- Built in eco-mode to reduce room temperature for a set time period and help save money and the environment.
- Built in boost mode to increase room temperature for a set time period.

Installer benefits

- 5 year warranty***
- Wiring plate for easy installation
- Backwards compatible with existing Honeywell Home products such as BDR91A and others
- Available in wired, wireless and OpenTherm® versions
- Compatible with a range of heating and cooling systems including heat pumps, zoning and underfloor heating and cooling
- Compatible with a range of hybrid and green heating systems, including heat pumps
- Thermostat design and function updated following installers' feedback*

Customer benefits

- 3 colour options to suit any home décor
- Coloured icons give a clear indication of device status
- Slim, unobtrusive design
- Honeywell Home trusted brand
- Easy-to-read LED-based on/off eco display
- Reduced maintenance with no batteries required**
- Frost protection built in
- Self-learning TPI fuzzy-logic control

*Resideo survey of 90 installers and 326 VOC's feedback 2022

** OpenTherm versions only
