Ready for a lead-free future

Lead-free drinking water filters

Pb FREE
EU Directive 2020/2184

Our next generation of water filters

Resideo combines decades of experience with forward-thinking innovation. The result: a new generation of Resideo Braukmann drinking water filters – now lead-free as per EU directive 2020/2184.

Ready for the future
Designed with sustainability in mind, our filters are made from lead-free materials (<0.1%) and meet the requirements of upcoming EU Directive 2020/2184 for components in contact with drinking water.

Built to last
We offer a 5-year warranty* on all our lead-free drinking water filters.

Products from the drinking water experts
At our site in Mosbach, Germany, we have been producing quality products for professionals and end users for decades – products you can rely on.†

Effective drinking water filtration for every home

Resideo Braukmann water filters help protect domestic water installations and appliances from dirt particles that can enter through the public water supply.

Double-spin technology

Models featuring our Double-Spin Technology achieve particularly effective cleaning performance: both the upper and lower filter areas are thoroughly cleaned at the same time.

Effective backwash technology

The backwash function keeps the filter insert clean: especially convenient with the optional automatic backwash unit.

Made in Mosbach. Ready for the future.

Our new filter generation is developed and manufactured in Mosbach, Germany – with the highest quality and technical precision.

- End-to-end control of manufacturing enables quality assurance at every stage of production
- Development and manufacturing in Mosbach – with over 65 years of experience
- State-of-the-art production methods and management systems: ISO9001, ISO14001, ISO40001, ISO45001
