ProSeries.

The ultimate end-to-end security and life safety platform.

Trusted to
the core.

Resideo systems
are installed in over
150 million homes
around the world,
every year.

Why ProSeries?

Security that can grow.

ProSeries is totally scalable. A modular design means installers can easily return for additional products as customers naturally expand their existing installation.

One platform, less inventory.

This is a single source security solution, so installers can provide a linked platform for the whole property, and distributors can simplify their inventory.

A future-proof platform.

With regular add-ons and hassle-free remote updates, ProSeries makes it easy for you now, and brilliant for your customers to leverage the latest technology any time.

Reach multiple markets.

Because ProSeries works for businesses and homes, you can reach more customers and win more business.

ProSeries.

Platform features and benefits.

Intuitive security.

ProSeries offers a host of features and benefits for professionally or self monitored security, day and night to give home and business owners peace of mind. It's responsive, alerts are faster than before, and there's hands-free disarming for an enhanced user experience.

Life safety.

Smart sensors detect safety risks from smoke and CO, with the capability of alerting emergency services if desired.

Smart home. Smarter selling.

ProSeries products offer a smart, connected home with a single, easy-to-use Total Connect 2.0 app, which controls lighting, locks, thermostats and more. Optional features like video storage help installers upsell and increase recurring monthly revenue.

Reduce training time with our intuitive user interface.

Current, 5-day and **severe weather alerts.**

Reduce customer service calls with our remote tools for end-user support services, system settings and firmware updates.

Leading the way.

Seamless. Scalable.
A platform that comes
packed with features.

Reduce false alarms with our easy-to-read full colour display with touchscreen. (PROAIOPLUS-EU Panel).

Built-in camera captures disarm photos to reduce false alarms (PROAIOPLUS-EU Panel).

Reduce installation labour and time with sensor batteries pre-installed.

Fewer engineer callouts with end-user replaceable parts such as batteries.

Simplify install with plug-in power connector option.

No holes to drill when you use the desk mount.

The same emergency icons your customers have depended on for years across all platforms.

Built-in speaker & microphone for two-way voice (PROAIOPLUS-EU Panel).

Reduce customer call outs with troubleshooting videos.

ProSeries. Software and Services.

ProSeries is not just hardware, it is enhanced by a dedicated installer platform, apps and supported services, offering the most comprehensive security solution for your customers to meet the needs of their customers.

AlarmNet 360™ platform.

This cloud-based business management platform helps to improve installer business operations, increase efficiency and productivity while delivering valuable insights on accounts, helping to drive growth and lower lifecycle costs.

The platform offers installers anytime, anywhere web and mobile control over programming, troubleshooting, account management and more all from the convenience of the cloud.

The AlarmNet 360™ (AN360) web platform enables ProSeries panel and peripheral programming and access to the Total Connect 2.0 app.

What AlarmNet 360™ can do for you and your customers.

Account Creation	<ul style="list-style-type: none">▪ Saves installation time with intuitive wizard-based account creation workflow
Remote Diagnostics	<ul style="list-style-type: none">▪ Eliminate engineer call outs with remote zone verification and diagnostics
Programming Templates	<ul style="list-style-type: none">▪ Guide the correct and consistent installation of systems▪ Reduces installation time
Checklists	<ul style="list-style-type: none">▪ Reduces call backs▪ Improves installation confidence▪ Streamlines install time
Insights	<ul style="list-style-type: none">▪ Installers can visually see active and comms failure status across their entire install base, enabling a proactive response▪ Better plan and schedule engineer call outs to similar locations▪ Allows analysis of individual purchases for current account holders to plan targeted marketing campaigns, sales strategies and up-sell offers (subject to customer consents)
Smart User Management	<ul style="list-style-type: none">▪ Assign system programming permissions to installers at your discretion▪ Give customer support agents access to account management and system diagnostics to help simplify the process
Endpoint Configuration	<ul style="list-style-type: none">▪ Configurability all in one place▪ Protect from errors with separate configuration and assignment permissions▪ Supports stringent security policies
Firmware Management	<ul style="list-style-type: none">▪ No need to wait – full flexibility and control, you decide when to update firmware for your customers

Security and innovation at every step.

Anytime, anywhere web and mobile control over programming, troubleshooting, account management.

Installation enabled by services.

With Pro-IQ™ Secure+ you now have the ability to access a range of additional services that complement a ProSeries installation for installers and end users.
