ProSeries.

The ultimate end-to-end security and life safety platform.

Introducing ProSeries.

Everything you need to protect your business.

Every business is unique. That's why we developed the ultimate professional security and life safety platform. To create a place where you and your employees can enjoy a safe working environment.

Whether you're looking for smart protection against intruders or alerting your employees and customers to potential hazards, ProSeries offers a scalable, hassle-free package that grows with your needs.

So you can relax and focus on your business, knowing that your premises are protected by a trusted brand, with products in over 150 million homes.

Why ProSeries?

Best-in-class security

Smart control

Whole business protection

Modular design

Built and installed by security experts.

No matter how big or small your security needs, ProSeries is a professionally installed solution that helps to keep your workplace protected with professional monitoring, 24/7.

ProSeries.

The ultimate security system, tailored to fit your business.

As a business owner, protecting your livelihood and your employees is a 24/7 responsibility.

The ProSeries platform combines a host of features and benefits in a scalable, secure ecosystem.

Smart sensors detect movement and potential intruders, allowing you and your monitoring station to verify alarms remotely. Making it easier to check for false alarms, e.g. employees operating the system incorrectly.

With professional monitoring you can add in an extra layer of out-of-hours protection, verifying alarms and alerting appropriate first-responders.

Together with fire, flood, smoke and even medical emergency support, ProSeries provides best-in-class security and life protection.

Whole business protection.

ProSeries' modular design is based on a single platform, so it adapts to your business. And if your needs grow, it can too.

ProSeries.

Stay connected,
whether at work
or at home.

Life is hectic enough. Now you can choose a security and life safety platform that brings smart protection all together with connected ease.

When you're away, the Resideo Total Connect app ensures that you can remotely check-in on your workplace.

And when you're at work, scene-setting functions will adjust lighting and thermostats automatically when you disarm the system. So you and your employees can enjoy a warm welcome.

Smart business control

Monitor from anywhere
via the app

Apps

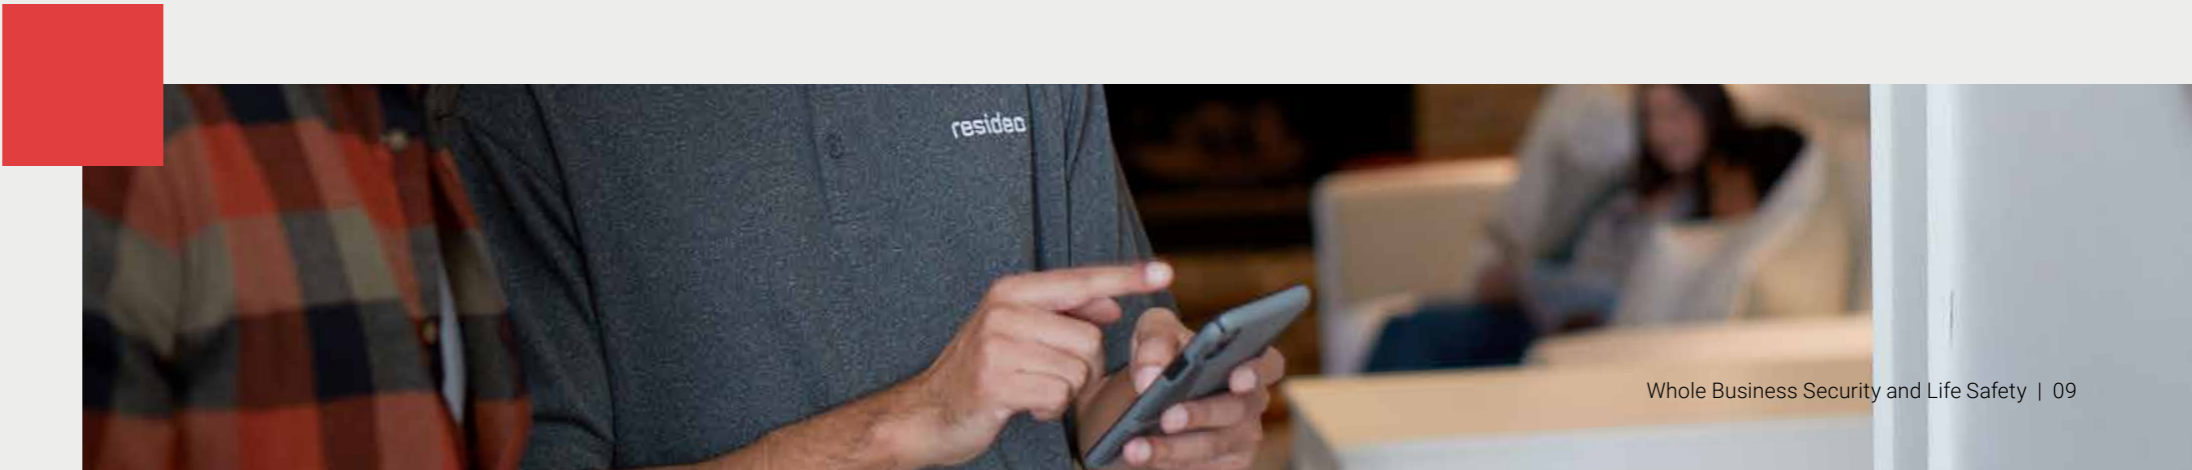

Total Connect 2.0

- Remotely access the platform anywhere, anytime.
- Control of security, video, smart devices and more.

Resideo Pro

- Installers can easily configure equipment to your business.
- Installers can run remote diagnostics on your system and alert of any issues.

What comes next?

Relax and let your installer take it from here.

No two businesses are the same, and we're all looking for something a little different from our security.

Our network of trusted installers are here to help, working with you to tailor the ProSeries platform to your needs and your budget.

While full control of the platform stays in your hands, the installation, updates, maintenance, and monitoring should always be done by a professional installer.

This ensures your safety and security is set up to the highest of standards from the outset, there are no install gaps, and you get the right advice and peace of mind you deserve, from a trusted ProSeries professional.
