Honeywell Home

The perfect fit

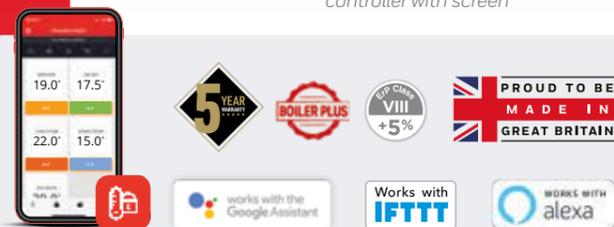

5 YEAR WARRANTY ★★★★★

evohome smart multi-zone system

A smart, connected heating system offering control of up to 12 heating zones and hot water. Helping customers manage their comfort level and heating costs in a way that suits them.

HR91 Radiator controller

HR92 Radiator controller with screen

- Scalable system – can be used as a single zone thermostat or can control up to 12 heating zones
- Ability to control hot water, time and temperature
- This system can also control underfloor heating

works with the Google Assistant

Works with IFTTT

WORKS WITH alexa

Non-programmable thermostats

Reliability, application flexibility and ease of installation.

DT4 Room Thermostat

- Compatible with OpenTherm gas boilers, combi boilers plus hybrid and green heating systems, including heat pumps
- Save your customer up to 10% on their heating bill when upgrading on a mechanical thermostat**
- Wired, wireless and OpenTherm* models available

ErP Class I +1%

Mechanical Room Thermostat

- 10-30°C set point range
- Switches up to 10 Amp
- Multiple options available including 16 Amp switching model

**Source BEAMA, based on test environment using a time clock, Class I on/off room thermostat and manual radiator valves, in an end-terrace/semi-detached house. Upgrade from a mechanical thermostat to a load compensating thermostat.

Smart programmable thermostats

With our smart thermostat and Resideo app, you're in complete control of your home's temperature — whether you're relaxing on the sofa or miles away. Comfort at home, energy savings when away. It's that simple.

T6R Series

- 2 channel, controls heating and hot water
- Geofencing technology
- Smart home integration
- WiFi not required to work as a standard programmable thermostat
- Wall mounted or table stand

SUNDIAL RF2 PACK	APPLICATION
Sundial RF² Pack One - Y9120H2009	Ideal for adding a room thermostat to combi-boilers and single heating zones
Sundial RF² Pack Two - Y9420H1008	Ideal for adding a room thermostat to an existing system that has stored hot water
Sundial RF² Pack Three - Y9420S2005	Ideal for adding a room thermostat and cylinder thermostat to new and existing systems
Sundial RF² Pack Four - Y9120W1000	Ideal for adding a hot water timer and cylinder thermostat to new and existing Sundial systems, or upgrading a gravity hot water system
Sundial RF² - Pack Five - Y9520Z1007	Ideal for providing two heating zones

Underfloor heating

CONTROLS UP TO 8 ZONES, OF WHICH 6 CAN BE WIRED

HCC100 Underfloor Multi-Zone Controller

Helps to control and balance a whole home system for efficient energy consumption. This all-in-one solution can be fitted with either wired or wireless Honeywell Home thermostats. In combination with evohome WiFi, the HCC100 offers even more control options.

HCC100 CONTROLLER
Bluetooth® enabled

MAX 20 THERMAL ACTUATORS

PUMP

MANIFOLD
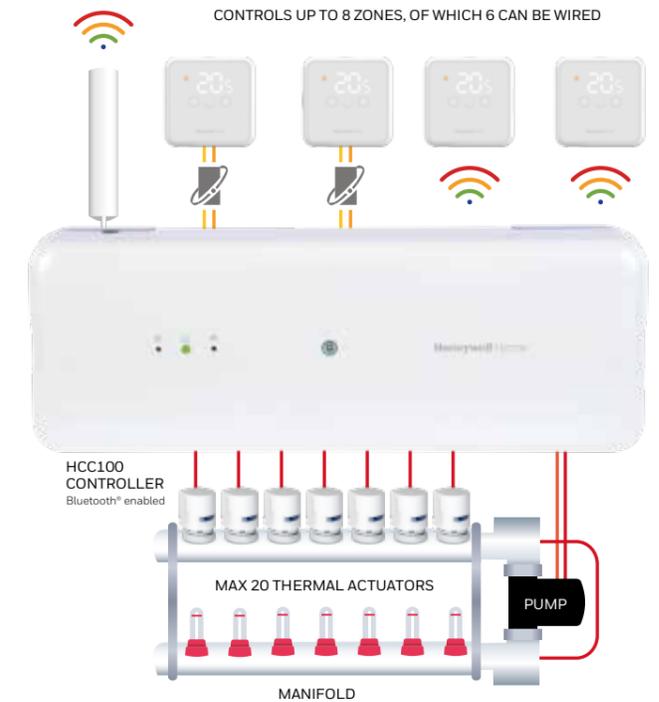

- Works with evohome system
- 20 selectable outputs for controlling hose groups via thermal motors
- Up to 8 individually controlled temperature zones with Honeywell Home thermostats, up to 6 of which can be wired
- Easy to configure via the Resideo Pro app

Wired & Wireless

Heating & Cooling

Boilers & Heat Pumps

Flexible Multi-zone

Thermal actuator

The MT4-HCC thermal actuators provide optimum control performance in combination with the HCC100.

The MT4 has been extensively tested and can be applied to almost all manifolds.

Motorised valves and spares

Providing superior quality and reliability, that installers have come to expect. Available in a range of models to meet all system requirements.

- Removable head and replaceable motor
- Durable rotating ball provides tight valve shut off
- Quiet operation and minimal power consumption
- 22mm zone valves, now available in twin pack
- Manual lever for filling and draining the system
- Manufactured in Europe since 2010

TRVs

TRVs significantly reduce the energy used by the heating system by limiting the temperatures within each room.

- A-Rated energy saving performance*
- Bi-directional flow valves
- Matching lockshield
- Various sizes and fittings available
- TRV balancing app available to help make the heating system work more effectively and efficiently

Valves and automatic air vent

Pressure reducing valves are designed to protect household appliances against excessive supply pressures. Automatic bypass valves reduce system noise and maintains an even system pressure. The automatic air vent offers extra protection to keep heating and non-heating systems operating efficiently.

Pressure reducing valve with gauge

Automatic air vent

Straight auto bypass valve

Angled auto bypass valve

L Series – Water leak and freeze protection

Wirelessly link L1 and L5 together to give whole house protection

The L1 Water Leak and Freeze Detector and the L5 Shutoff Valve alert customers to leaking or freezing pipes
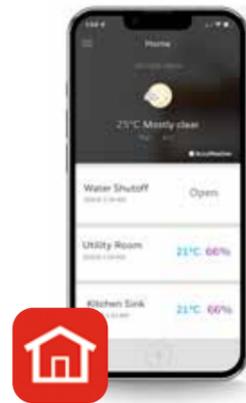

L1 WiFi Water Leak & Freeze Detector

- Includes a 1.5 m cable that senses water along its entire length
- Extend coverage up to 152m by connecting additional sensing cables

L5 WiFi Water Leak Shutoff Valve

- Shuts off water supply when water is detected
- Resideo Smart Home app notifies the user of any leak or shutoff events
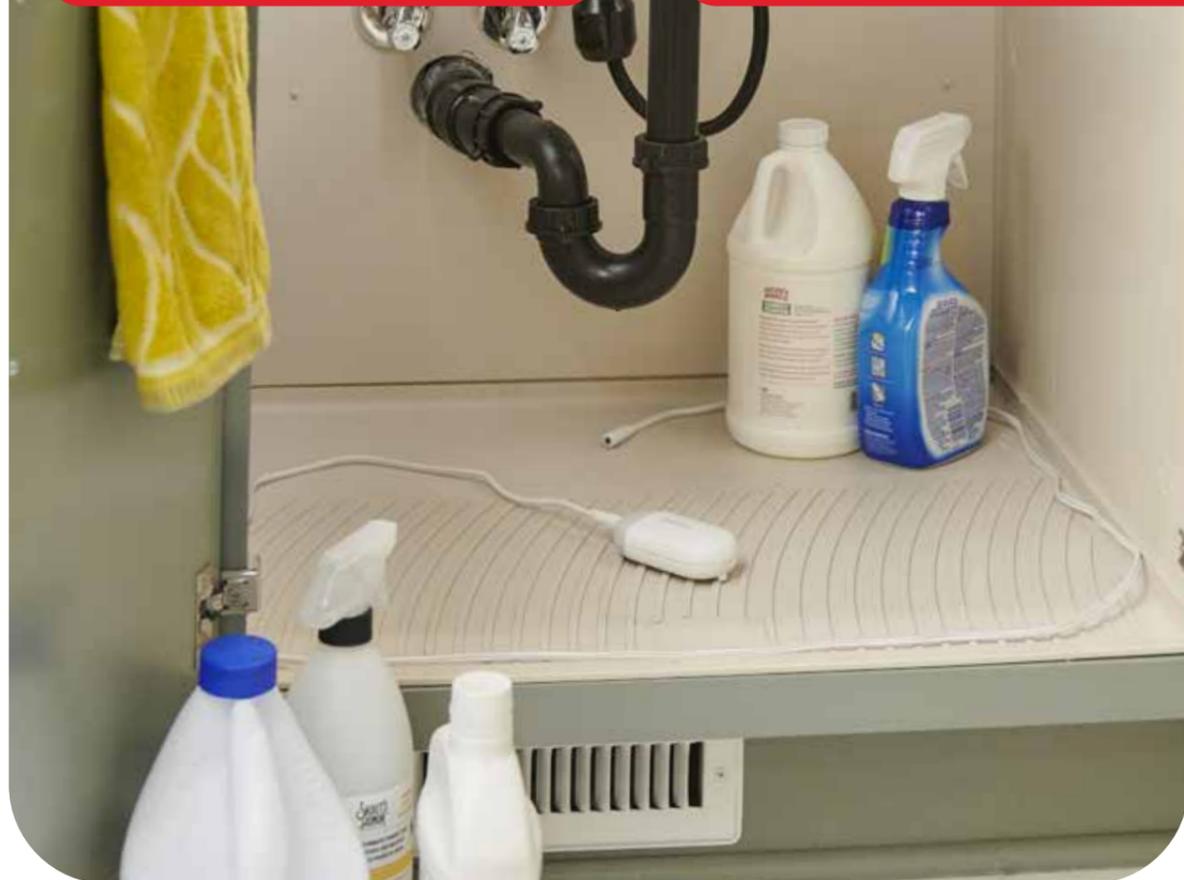

Smoke, heat and CO alarms

Invisible threats such as fire, smoke and noxious gases can put people at risk. Our comprehensive line of standalone and interconnected smoke, heat and carbon monoxide detectors will help keep the home safe.

The range of interconnected alarms can be wirelessly linked to each other, so when one alarm is triggered they all sound, maximising the alert in the event of an activation.

- Super-slim design (R200C/R200C-N/R200S only)
- Audible and visual red 'ALARM' text for the deaf and hearing-impaired
- Easy to create a connected home (up to 12 alarms interconnected)
- Interconnected alarms come with built-in wireless module
- High-reliability alarm system for customers who look for advanced safety features
- Ideal for houses, apartments, and caravans where several alarms are needed

Resideo apps

For the professional
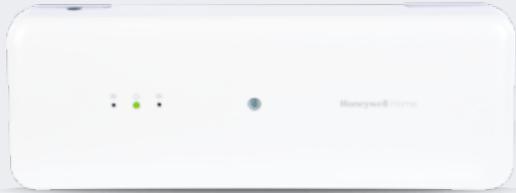

The Resideo Pro App

Is specifically tailored for use by installers. It simplifies the installation and configuration processes for a range of Resideo products including HCC100. Users benefit from faster installs and more ways to connect with customers.

TRV Balancing App

Use the Honeywell Home TRV balancing app to work out the pre-set value rather than calculating it manually.

Simply...
1. Select the valve type
2. Select the radiator model
3. Enter the inlet, outlet & radiator dimensions
4. And check the result!

Wiring Guide App

Get access to the wiring guide from Honeywell Home so you don't miss out on...

✔ Wiring guides
✔ Troubleshooting
✔ Access to training modules
✔ Fault finding

For the homeowner

The Resideo App for the homeowner

With the Resideo app, homeowners can take control of their home comforts at the touch of a button.

The Total Connect Comfort App

The Total Connect Comfort app brings you the peace of mind you need, knowing your home is safe, secure and under control, making it easy to manage multiple thermostats and security devices across many locations — for the whole family.

Peace of mind for years to come

Reach perfect comfort at home, with a brand you can trust. Our products are built to last, and continue to offer our customers the control, reliability and durability to create the home they want and deserve — for years to come.
