

SOUNDS LIKE YOU COULD USE A CONNECTED SOLUTION.

If home odors and humidity levels are creating uncomfortable living conditions in your home, integrating a variety of connected devices controlled by a smart thermostat can help. An air purifier will help control odor causing particles while a dehumidifier can help control humidity levels. Combining these systems with an additional temperature sensor will help prioritize the temperatures throughout your home and reduce utility costs. To learn more about a custom whole home solution for you, connect with a Resideo Pro today.
