

SOUNDS LIKE YOU NEED A SMART HOME DETECTION SYSTEM

 LIFE SAFETY +  ENVIRONMENTAL

Whether carbon monoxide is detected, a fire breaks out or you have a faulty water pipe, professionally-installed smart detectors can help keep your home safe when you're away. If a smoke or carbon monoxide detector is triggered, sirens will sound, alerting a central station and sending an alert to your mobile device. And in the event of an emergency, trained professionals will dispatch emergency crews to your home and call to let you know help is on the way.
