Be prepared and help prevent water damage the smart way.

# Braukmann L5 WiFi Water Leak Shutoff Valve

## Shut down water leaks at the source

Technology is making homes safer, smarter, and more connected. And that now includes home water leak management. New from Resideo, the Braukmann L5 WiFi Water Leak Shutoff Valve upgrades your customer's homes to a smart water solution. The device automatically shuts off the water flow in the event of a leak, protecting you from potentially expensive damage and household disruption.

- **Connected and in control**

The Resideo app can be setup as a water leak detection control panel with notifications, customized alerts, and pre-set shutoff locations. The wireless functionality means you can control your home's water from anywhere.

- **Automatic and accurate**

The L5 Valve shuts off your home water supply when it detects water via a connected 5-foot sensor cable. Plus, easily link with multiple Resideo Water Leak and Freeze Detectors for even more coverage throughout your home.

- **Smart and simple**

Save water, save money. You usually won't notice a leak until the damage is already done. Have peace of mind that you are helping protect yourself from potentially expensive damage to your home and belongings.

- **Home or Away**

The Water Shutoff Valve can send alerts to your phone when water is detected allowing you to manage your home's water even when you are away. You can also assign alerts to anyone, especially helpful if you own a second property or want to notify your plumbing professional automatically.
