Advanced Modular Communicators

**Fast Operation. Versatile Installation.
Innovative Technology.**

Z-Wave® Capable

Wi-Fi® Capable

Ethernet®

LTE®

Advanced Modular Communicators provide dealers with choices on communication paths, what panels to connect, how to program and what services to deliver the end-user. They easily connect to customers' residential and commercial security system control panels to send alarms and messages to AlarmNet® for transfer to the central monitoring station.

Modular to support changing needs and technologies

Strong signal penetration

Future-focused design to increase lifespan

Multiple communication paths

One communicator works for residential and SMB customers

Control of connected devices

Fast Operation

End-users get quick response times with Resideo Total Connect® 2.0 Remote Services allowing for easy and reliable control over their home or business.

Advanced Modular Communicators are easily programmed and activated using AlarmNet 360®. The cloud-based software allows for system programming from anywhere, with the flexibility of using the website or mobile app.

Also, Advanced Modular Communicators allow for VISTA®-15P, 20P and 21iP Panels to be fully programmed using AlarmNet 360. The simple programming flow will reduce install time, make technician training easier and reduce programming errors.

Models:

Communicators

AT&T®

- LTEM-PXA (US and Mexico)
- LTEM-PA (US, Canada and Mexico)
- LTE-KLA (Latin America)

Verizon®

- LTEM-PXV (US)
- LTEM-PV (US)

Bell®

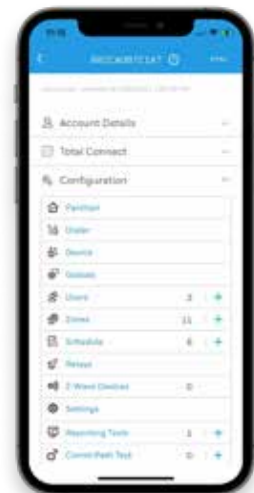

- LTE-KCN (Canada)

Internet Only

- IP-COM (US, Canada and Mexico)

Advanced Modular Communicators support optional plug-in modules:

- Wi-Fi®/Z-Wave® Module
- Wi-Fi Module
- Dialer Capture Module

The AlarmNet 360 App provides

- Simple, reliable quick programming
- Quicker technician training times

Versatile Installation

Competitive Takeover

Advanced Modular Communicators allow you to easily take over competitive control panel communications. Get all the benefits without having to replace a control panel. Streamline your business by having more of your accounts on the AlarmNet® network.

Get reliable alarm communication solutions available on more control panels, including Resideo, Honeywell Home, Interlogix® and DSC®.

Installation Choices

Advanced Modular Communicator opens dealers up for powerful installation choices. Decide on the communication path, between Cell only, Cell and Ethernet® or Cell and Wi-Fi®. Directly connect to panels using the Dialer, Keybus or ECP connectors.

Innovative Technology

The beauty of the modular design is that it gives you choices within today's technology while future-proofing for tomorrow's technology.

Today, choose from add-ons, such as: **Wi-Fi/Z-Wave® Card** to expand communication path choice and give customers control of smart devices without having to install additional keypads.

Wi-Fi Only Card to expand communication path choice.

Dialer Capture Module to make Advanced Modular Communicators a universal communicator that can work with competitive panels.

Optional add-ons mean you only need to buy and install what's needed for each job.

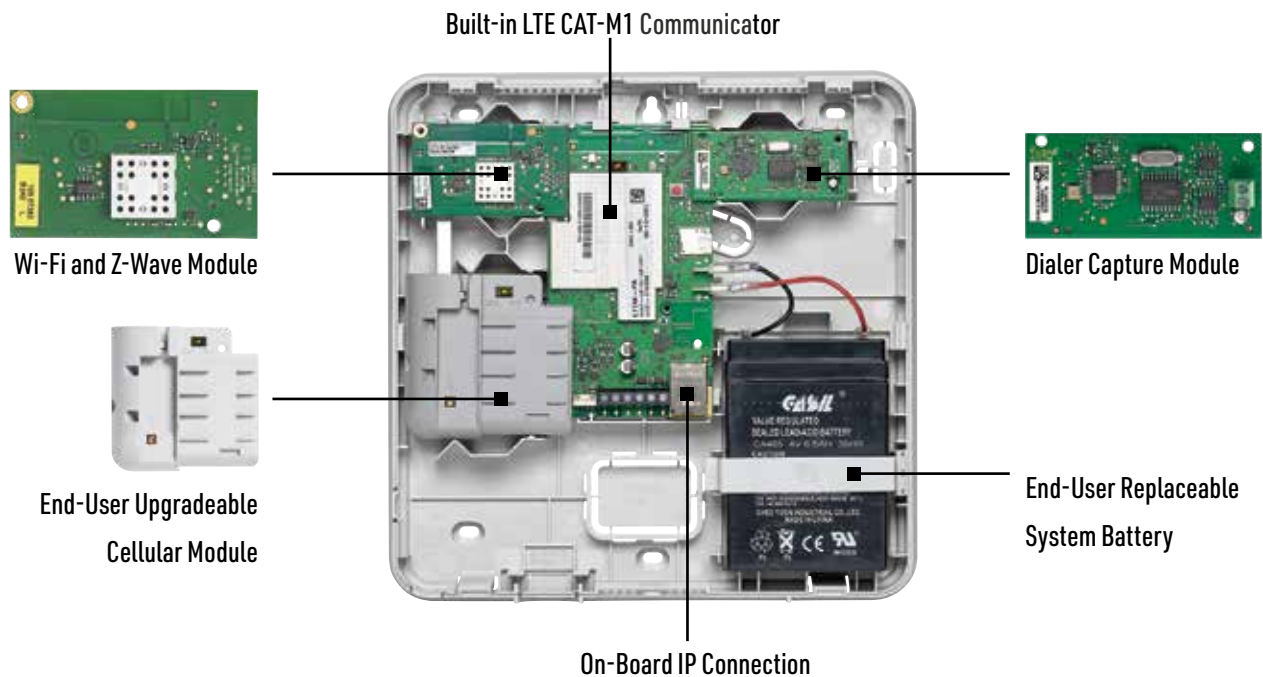

Image shows LTEM-PA for example purposed only. This does not reflect the design of all models.

Resideo's advanced modular communicators deliver fast operation, versatile installation and innovative technology.

With Advanced Modular Communicators your customers get anywhere control of security and smart devices through Resideo Total Connect® Remote Services. As a dealer you get an advanced line of LTE® products with improved performance,

quick programming, and flexible installation options. Our modular design means you have options within today's technology that prepare you for tomorrow's technology to keep your customers protected.
