Introducing ProSeries.

EVERYTHING YOU NEED TO BE MORE COMPETITIVE, DIFFERENTIATE YOUR COMPANY AND SELL MORE HOMES.

At Resideo, we know that selling your homes is as unique as you are. That's why we developed our ultimate professional security system – to create a product where you can offer a platform your customers can enjoy life together, whatever their needs.

Whether your customers need a system to protect against intruders, alert them to potential hazards or just welcome them home after a long day, ProSeries brings security, safety and comfort together in a hassle-free package that's easy to control and grows over time along with them.

THE PROSERIES PACKAGE

World-class security

Whole-home safety

Smart home control

Motion detectors

Motion viewers

Sensors

Professional monitoring

Sirens

World-class security.

THE ULTIMATE SECURITY BLANKET, TAILORED TO FIT YOUR HOME.

Nothing matters more than helping a homeowner protect their home and the people inside it. So why put them in the hands of a generic, one-size-fits-all security system?

ProSeries offers flexible, professionally installed security tailored specifically for their home and family. It alerts them to movement and potential intruders, allowing them to verify these by video – so no more false alarms from mischievous pets! What's more, 24/7 professional monitoring can verify alarms and alert appropriate first-responders if necessary. Put simply, no matter how big or small their world ProSeries helps you keep it safe and secure, wherever they are.

Heat sensors

Smoke sensors

Flood sensors

Carbon monoxide sensors

Medical & panic transmitters

Whole-home safety.

OUR WHOLE FAMILY, BROUGHT TOGETHER TO PROTECT THEIRS.

When it comes to looking after the things we love, we all want simple, reliable ways to keep our homes safe. But unfortunately, 'simplest' doesn't always mean 'safest'.

ProSeries combines the whole family of Resideo safety products to create a home that looks after the people inside it. From fires to floods, carbon monoxide to smoke – even medical emergencies – the system helps ensure everyone, no matter where they are in the house, knows if they need to get out quickly. And it's built and installed by home safety experts – no more guesswork with overcomplicated 'do-it-yourself' systems. So if they're looking to protect the things that matter most, a trusted professional can bring security and safety together.

Voice control

Monitor from anywhere

Smart home integration

Automatic unlock/disarm

Scene setting function

Smart home control.

alexa built-in

SECURE WHEN THERE'S AN EMERGENCY. INVALUABLE WHEN THERE'S NOT.

Life can be hectic for your customers, even if they're not worrying about an emergency or false-alarm at home. That's why ProSeries doesn't just help protect them - it brings all their smart home products together, allowing them to manage them all from one single system.

ProSeries connects their home, with dedicated touch-screen panels and built-in Amazon Alexa to control security settings, raise the temperature, adjust lights and much more; all with the touch of a button or a simple voice command.

When they're away, the Total Connect app ensures they stay in touch with their home. And when they get back, scene setting functions adjust lighting and thermostats automatically when they disarm the system - so they can enjoy a warm welcome.

The ProSeries system.

WELCOME TO THE FAMILY.

ProSeries is designed to be flexible. Its modular design is based on a single platform, so it adapts to any of your home designs. And if their needs grow, it can grow right alongside with them.

What comes next?

RELAX AND LET US TAKE IT FROM HERE.

No two homes are the same, and your customers are looking for something a little different from their home security. That's why our network of trusted professionals work with them to tailor the ProSeries system to meet their exact needs.

While full control of the system stays in their hands, they can confidently leave installation, updates, maintenance and monitoring to the professionals.

Expert installation from trained professionals not only helps ensure their safety and security is set up to the highest of standards from the outset; it also means they don't need to worry about complicated set-ups or tricky instruction manuals.
