Announcing the Newest Feature for Total Connect® 2.0 App Users — Alarm-Cancel-Verify

False Alarms Happen
Your ProSeries system, using the Total Connect 2.0 app, can now help you reduce the number of accidental alarms and dispatches, potentially resulting in costly fines.

With the Alarm-Cancel-Verify feature, a simple tap or swipe can designate an active alarm as user verified or as a false alarm — avoiding unnecessary police dispatches or financial penalties associated with multiple false alarms.
