THE PERFECT FIT. RESIDEO PRESS SOLUTIONS.

Count on Resideo's expanding portfolio of hydronic products featuring Press fittings

PRESS HYDRONIC SOLUTIONS FROM RESIDEO

Press is one of the best, most secure connections on the market. Creating a press connection is a simple and a quick alternative to traditional methods of joining pipe, taking just seconds. Plus, there are no fire hazards, fumes or emissions. Press fittings consistently create uniform, clean, and reliable joints – saving you time and money.

RESIDEO OFFERS A GROWING PORTFOLIO OF PRESS SOLUTIONS FOR ALL OF YOUR CUSTOMER'S WATER NEEDS, WITH MULTIPLE SIZES AND OPTIONS TO MEET THE SPECIFICS OF YOUR JOB.

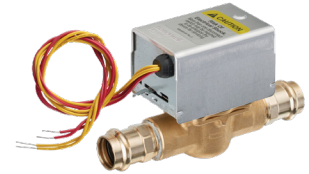

Magnetic Hydraulic Separators

Take boiler efficiency and protection to the next level with our magnetic hydraulic separators – part of Resideo's portfolio of hydronic products. Designed to address air, dirt, hydraulic, and magnetic separation all in one device.

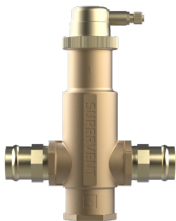

Press Boiler Trim Kits

The Press boiler trim kit has all the rebuildable parts that Pros have been asking for as part of the most commonly needed parts for installation. Each kit contains a high-quality Press SuperVent® air eliminator, Press NK300S boiler feed combination, and expansion tank with service check valve.

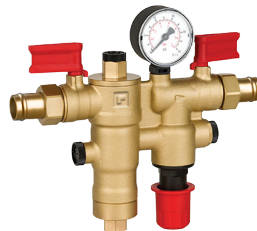

Press V8043 Zone Valves

With Press fittings threaded in with Loctite; water has no chance of escaping. These low-voltage valves consist of an actuator and valve assembly for controlling the flow of hot water in applications such as baseboard radiation, convectors and fan-coil units.

Press PV SuperVent® Air Eliminators

Easily vent out the air in hydronic systems without breaking a sweat, all while using the most secure connection you'll find on the market. Resideo's Press PV SuperVent® Air Eliminators have debris baffles to control dirt fouling and to prevent failing. The adjustable vent top collar ring allows for easy installation and application flexibility.

Press NK300S Boiler Feed Combinations

This single casted boiler feed combination contains an integrated pressure-reducing valve, strainer, double-check backflow preventer with air vent, and pressure gauge (ASSE1081) – what every residential, light commercial or multi-family building with a boiler needs to speed up installation and checkout, and minimize maintenance.

Press AM Series Mixing Valves

Mixing valves from Resideo accurately adjust, maintain, and limit the hot water temperature to a desired setting – providing comfort, protecting equipment and increasing the amount of safe, usable hot water. Union Press options for ASSE1017, ASSE1070 and hydronic applications.
