

MELVILLE – October 5, 2009

Mr. Vince Adams
Honeywell Security Inc.

Subject: AlarmNet Network

Dear Mr. Adams,

This is to confirm our correspondence regarding the subject network. At this time UL views this as part of the communication cloud between protected properties and central stations. In view of this we do not conduct periodic counter checks of the network operation or the various towers and other facilities that are used to move signals between these locations. This is not unlike the way in which other transmission methods are viewed.

I hope this provides you with the information you require.

Sincerely,

A handwritten signature in black ink that reads "Peter Tallman".
