

Honeywell Home

GET \$75 REBATE WHEN YOU ENROLL ANY HONEYWELL HOME SMART THERMOSTAT

Save with Xcel Energy

Save with Xcel Energy

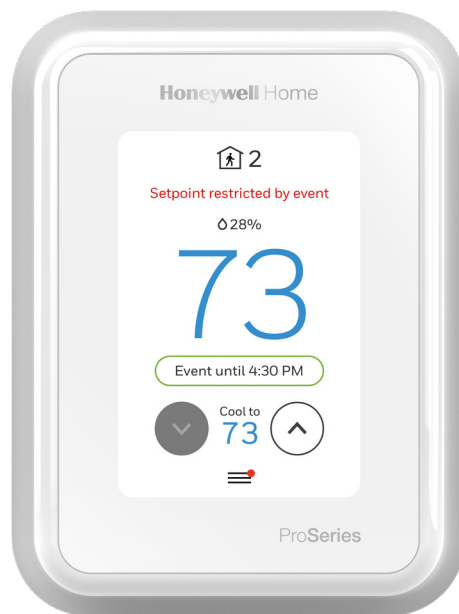

Earn rewards from Xcel Energy as a thank you for helping reduce stress on the power grid during peak times throughout the year.

How it works

- 1 Install any Honeywell Home Wi-Fi thermostat
- 2 Once it's been connected to Wi-Fi, visit honeywellhome.com/rebates
- 3 Connect your Honeywell Home account to your Xcel Energy account
- 4 You'll receive your rebate through your bill in a few weeks

This means Xcel Energy will occasionally adjust your thermostat for a short time during peak times of your neighborhood's energy usage. For example, peak usage time for cooling homes during the summer tends to be between 3 p.m. – 8 p.m. Your thermostat will pre-cool your home before those peak usage times so that your home stays comfortable. Plus, you'll always have the control to change the temperature at any time.

Rebate not available in Wisconsin.
