ElitePRO™ S1200 Smart Thermostat

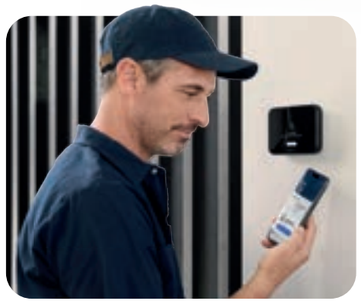
A new style of comfort

The ElitePRO™ smart thermostat stylishly combines comfort, convenience, and energy efficiency with advanced features today's buyers expect. It uses radar and auto-away to sync with residents' location and automatically dial back energy use when users are away. Built-in sensors measure and monitor indoor air quality to keep air fresh*. Built-in system diagnostics and smart alerts keep watch over the HVAC system – helping to avoid costly surprises. Connect your ElitePRO thermostat with your growing ecosystem of smart devices on a single platform using the First Alert app.

*Additional HVAC equipment and accessories may be required.



ElitePRO™ Smart Thermostats

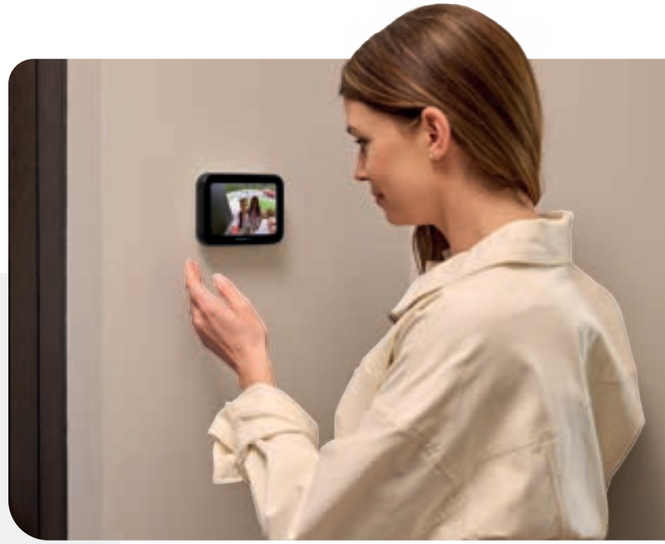
The sleek family of smart thermostats delivers modern design, customizable touchscreens, indoor air quality (IAQ) control, and advanced features to enhance the smart home experience.

Simplify setup and save time

Techs can easily configure the thermostat's installer setup (ISU) directly in the Resideo Pro app or apply pre-saved templates. The streamlined process helps standardize installs and speed up time on site.

Smarter together

Comfort and video solutions – seamlessly integrated into your smart home. See and speak to visitors at your door directly from the thermostat – compatible with First Alert® and Ring® video doorbells.



Smart Security & Water Solutions

Integrated security. Smart control.

The VX series security cameras and L series leak detectors offer advanced security and water leak detection for homeowners, with seamless control and monitoring via the First Alert app.

First Alert VX Series

Offer homeowners intelligent event detection, distinguishing between people, packages, vehicles, and animals. Featuring high-resolution video and seamless smartphone control, our AI-powered technology minimizes false alarms, delivering precise and reliable security alerts.

One app. More control.

Give homeowners the control they desire — with security and water management devices that work together in one easy-to-use app. It's a modern smart home experience that adds everyday value and long-term appeal.

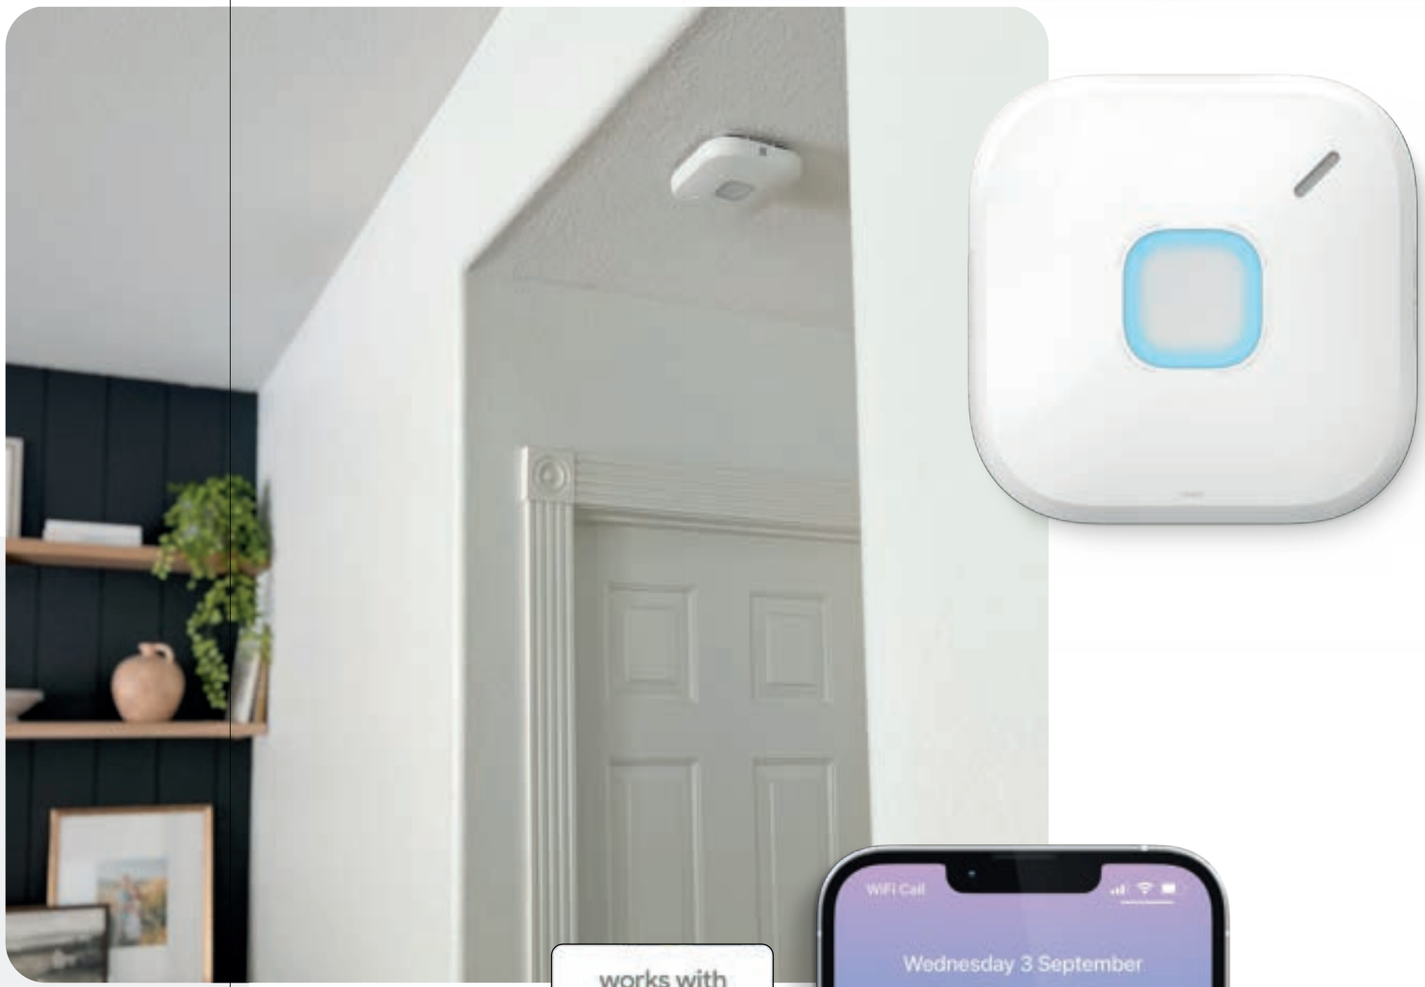
Life Safety

Connected detection from fires and carbon monoxide

Equip homes with the latest in smoke and carbon monoxide detection. The BRK SC5 Smart Smoke & Carbon Monoxide Alarm helps you optimize fire safety offerings with smart 2-in-1 smoke/fire and CO detection. Plus, with First Alert app connectivity and compatibility with Nest Protect, BRK, and First Alert alarms, it's easy to integrate and upgrade any home's safety system.



Smart detection made simple

The BRK SC5 offers Precision Detection™ advanced sensing technology, intelligent app notifications and seamless integration with standard, select First Alert/BRK alarm models. The alarm's interconnectivity ensures that when one alarm sounds, all compatible alarms will sound with mobile and voice alerts to notify the homeowner of the emergency and signal within the First Alert app, whether home or away.

Builders can provide cost-efficient detection by installing one Smart Smoke & CO Alarm alongside several standard wired interconnected First Alert/BRK smoke alarms, as all alarms within that system can trigger app notifications.

Sends mobile alerts whether home or away in the event of a fire or CO emergency.

Equipped with Precision Detection Technology to help reduce nuisance alarms.

Installation is quick and easy with hardwire and battery alarm options available.

Interconnected so when one alarm sounds all compatible alarms sound as one.

Indoor Air Quality

Whole Home Dehumidifier

Built to last.
Engineered to adapt.

From installation to long-term service, our dehumidifier delivers standout performance across every touchpoint. Backed by over 150,000 hours of rigorous lifecycle testing and engineered for flexible installation and serviceability.

Replaceable components simplify service and support long-term reliability, while smart sensors – monitoring inlet/outlet temperatures, RH, and pressure differentials help extend system life. With top-tier efficiency across all capacities, it is a dependable choice for performance-driven projects.

Smart design.
Smooth installs.

A configurable onboard display, built-in bubble level, a movable magnetic onboard display screen for flexible placement and easy viewing make installation easy in more locations – with less adjustment on site.

Meet real world demands with this versatile, durable, and efficient ENERGY STAR® certified solution.

Sustainability

Connected homes. Sustainable savings.

Sustainability starts with better choices. Resideo provides energy-efficient solutions that help homeowners reduce their carbon footprint — and lower their utility bills.

Built to last. Engineered to adapt.

Built for efficiency

Our solutions help optimize energy use, improving a home's Home Energy Rating System (HERS) score and increasing buyer appeal.

A trusted partner

We work with builders to meet evolving energy efficiency standards and simplify compliance with regulatory mandates.

Whole-home approach

From smart thermostats to leak detectors and zoning controls, Resideo offers integrated solutions that reduce waste, cut energy use, and protect what matters. It's not just about saving on bills, it's about building more resilient, future-ready homes.

16

ENERGY STAR® certified thermostats*

More than any other company

*as reported on energystar.gov.

Everyday efficiency

Resideo's smart technology works in the background to optimize heating, cooling, and energy use, so homeowners can stay comfortable and in control while using less. Energy efficiency doesn't have to be complicated. It just has to be smart.

22%↓ **Heating use**

17%↓ **Cooling use**

Honeywell Home thermostat users save on their HVAC energy consumption when using the recommended scheduling feature consistently.*

*Results are based on random sample of 6,000+ U.S. Honeywell Home ENERGY STAR® certified thermostat users, in 2023, who adopted a schedule routine, incorporating the default schedule setpoints at least 14 days in a monthly period. It compares users' scheduled setpoints, following the default schedule setpoints, to their own comfort baseline setpoint during both heating and cooling modes.

Emissions impact

Our ENERGY STAR®-certified thermostats prevented 2.9 million metric tons of Co_2e emissions in 2024 alone — the equivalent of powering over 393,000 U.S. homes for a year. By making small changes at home, Resideo customers are making a big difference for the planet.

2.9

million metric tons CO_2e

Grid-friendly homes

Resideo is helping homes do more than just consume energy — they're helping support the grid. In 2024, energy savings from our smart thermostats were enough to offset the annual power use of 393,000 homes. It's the power of everyday efficiency, scaled to grid-level impact.

393,000

homes

Equivalent number of homes whose annual energy use was offset by Resideo thermostats in 2024.

resideo

Resideo offers one platform with endless potential

Smart, scalable solutions across comfort, safety, security, and water management – all connected through the easy-to-use First Alert app, with no obligation or added complexity for your buyers.

With Resideo, you're not just installing products — you're building connected homes that stand out in the market.
